

Historical Sightings 1957 - Part 2

- USA, New Jersey, Point Pleasant: A boomerang-shaped object bigger than a house was reported to have landed. Grass flattened.
- USA, New Mexico, Santa Fe: J. Martinez and A. Gallegos saw an egg-shaped object coming toward them at low altitude. It moved slowly, illuminating their car and producing a humming sound. The car engine, the clock and a wristwatch stopped. The object shot away toward the southwest.
- USA, New Mexico, White Sands: At Stallion Site, an army patrol in a jeep saw an orange, "apparently controlled," luminous object on the ground. It was first seen as a sun-like source 50 m above ground, descending to ground level after 3 min, and landing several km away at the northern end of the testing grounds. Two witnesses.
- USA, New York, New York City: In Van Cortland Park, Frank C. was talking with a bus driver when they saw in the park, about 400 m away, a metallic object shaped like a disk, spinning with a soft whirring. On top was a fixed dome with portholes. The object was hovering at tree height. A yellow light from the craft suddenly illuminated the area, and it flew off "like a shooting star."
- USA, New York, Schenectady: Mrs. Edward Yeager who lived in a trailer on the Duanesburg Church Road near Mariaville, saw a circular object go down behind the hill. Two min later it flew up again, very bright. The next day she was feeding animals that ran away as the same, or a similar object came, within 2 m of the ground. Two dark, little men came out of the craft and went into the woods. The object remained there two min, then left. A search for the occupants proved futile. A bus driver was said to have seen two craft land in a nearby field at the same hour.
- USA, New York, Sloanville: A cigar-shaped object 70 m long was observed less than 7 m above ground.
- USA, Ohio, Lake County: A civilian source reported an object so bright that his eyes could not sustain it. It appeared to land on a ridge, then took off again. It was round and much larger than a plane, had an "odd color," left no trail and made no noise.
- USA, Ohio, Madison: Mrs. Leita Kuhn observed a very large, lighted object 20 m above ground. It was so brilliant that she had to close her eyes. It was over 10 m wide, 3 to 4 m thick, with a dome on top. The witness had to consult a physician several days later because of serious eye and skin irritation.
- USA, Ohio, Montville: Olden Moore, 28, a plasterer was driving home when he suddenly saw an object looking like a bright meteor split into two pieces, one of which went straight up. The other got larger while its color changed from bright white to blue-green. It hovered 60 m above a field and came to the ground with a soft whirring sound, 150 m away. After observing it for 15 min, Moore then walked to the object, which he

found to be shaped like "a covered dish" 15 m in diameter, 5 m high, with a cone on top about 3 m high, surrounded by haze or fog, pulsating slowly. Holes, footprints and radioactivity were found at the site by Civil Defense Director Kenneth Locke.

- USA, Oklahoma, Woodward: Between Woodward and Seiling, 12 km from the latter, an unknown flying object allegedly took complete control of a car with three passengers. The driver, an employee of an aircraft company, had turned the heater, windshield wiper, and radio on. He was nearing a hill in this wooded area when a bright light appeared ahead. It reminded the witness of the light from a mercury lamp. As a crash seemed imminent, the car slowed down by itself and stopped, as if the entire electrical circuit had failed. Over the vehicle was a disk 16 m in diameter with portholes around the periphery, emitting a current of hot air and a high-pitched sound. It had a dome on top and bottom. It rose as the car started by itself. The car was a 1954 Dodge Coronet without automatic transmission. The witness spent four hours with two Kirtland AFB officers who told him of similar observations. The case was never reported to Blue Book.
- USA, Oklahoma: On July 17, an RB-47 aircraft equipped with special electronic intelligence equipment was followed from the Gulf of Mexico all the way to Oklahoma by a UFO that flew circles around the aircraft.
- USA, Pennsylvania, Milford: Frances Stichler, who lived on a farm, was working in her barn when she heard a whirring sound and saw a bowl shaped object, 7 m in diameter, with a rim over 1 m wide about 5 m above ground. It stopped with one side tilted toward her. A man dressed in a loose, shiny, gray suit, wearing a tight fitting helmet, was facing her from inside the object. He seemed of average height, had deep-set eyes, tanned skin, and a long face with a "quizzical" expression. Almost immediately the object left toward the southeast.
- USA, Tennessee, Knoxville: 12 year old Everett Clark saw a strange object on the ground and four occupants, two men and two women who spoke a language he thought was similar to German. They went back to the craft in a manner the witness could not understand, for he saw no door.
- USA, Texas, Boerne: A civilian source reported an oval object, about 5 m long, bright orange, similar to glowing coals, hovering 4 m above ground. The witness went to call his family; the object had vanished when he returned.
- USA, Texas, Canadian: 5 km west of this town, military and civilian witnesses reported a submarine shaped object, red and white, two or three times as long as a car and about 3 m high, at ground level. A figure was seen near this object, also something compared to a white flag. When a car stopped in the vicinity, a flash of light from the object coincided with the sudden failure of the headlights.
- USA, Texas, Levelland: A number of motorists and police officers in different localities encountered at close range a luminous egg-shaped object estimated at about 200 feet in length. Several reports confirmed that when the object passed at close range car engines

and lights failed. One report described how two men driving a truck watched as the object came near. The lights and engine failed, then the object passed directly over the vehicle with a sound like thunder and a rush of wind. The truck rocked from the blast, and a lot of heat was felt. Later, there were reports in other areas near Levelland of apparently the same luminous object on the ground and taking off. Reports of vehicle interference followed a similar pattern, with engines and lights returning to normal on the departure of the object.

- USA, Texas, Levelland: Residents see several cigar-shaped UFOs.
- USA, Texas, Yellow Falls: Three hundred people were said to have seen three elongated objects with a series of portholes, maneuvering at ground level in an area with many empty oil wells. One of these objects, said to be 150 m long and 20 m high, pearl-colored, glistening under the setting sun, and showing a series of circles painted on its surface, landed for 20 min. An occupant emerged, observed the abandoned derricks and took off again. Observed through binoculars, he appeared as a "monster," 1 m tall, moving with strange jumps. He picked up something from the ground.
- USA, West Virginia, Holly: Hank Mollohan and eight other persons saw an elongated object, 12 m long, with several portholes from which fire and smoke appeared to be coming. It swung at low altitude and dropped to the ground. People seemed to be moving around it, but the witnesses were driven away by a hard rain.
- USA, Wisconsin, Ellsworth: Many cars stopped to observe a silent, reddish, glowing disk, about 15 m in diameter, which flew 6 m above the ground at about 80 km/h. A small, windowless cabin was visible on the underside of the object.
- Venezuela, Uriman: Report of a landing, and of "bellicose dwarfs."
